

NEW DELHI-HYDROponics

Feed chart - Coco

Liquid Trio 3-Part plant nutrition.

Use equal measure Micro, Grow and Flower concentrates to attain target EC values.

Never mix concentrates directly with each other. First add the ICM to the water reservoir, mix well, then add micro, grow and flower.

All values in millilitre per litre (*ml/l*) of water. Target EC values do not consider background EC of water, which should have an EC of below 200.

	Week 1	Week 2	Week 3	Week 4	Week 5	Week 6	Week 7	Week 8	Week 9	Week xx	Flush
Micro	1	2	2	3	4	4	5	5	4	4	-
Grow	1	2	2	3	4	4	5	5	4	4	-
Flower	1	2	2	3	4	5	5	5	4	4	
the ICM	1	3	3	3	3	2	0	0	0	0	
Target EC	0.5	0.8	0.8	1.2	1.6	1.6	1.6	1.6	1.4	1.4	0.3
